

LASERMACH

Diode Laser Hair Removal Solution

LASERMACH

Lasermach is a next-generation multi-wavelength diode laser system for safe, effective hair removal on all skin types (Fitzpatrick I–VI). Fast, comfortable, and virtually pain-free, it maximizes clinic efficiency and patient satisfaction.

Suitable for all skin tones

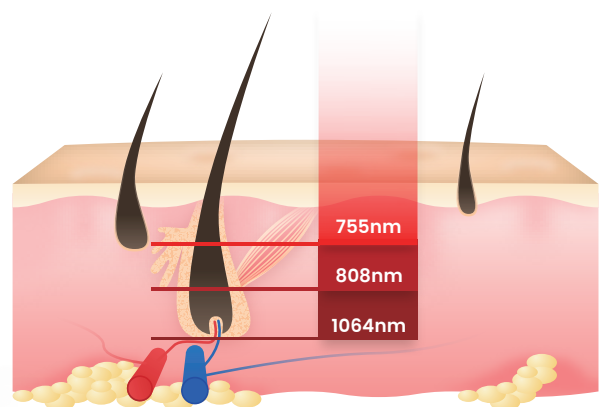

Compressor refrigeration

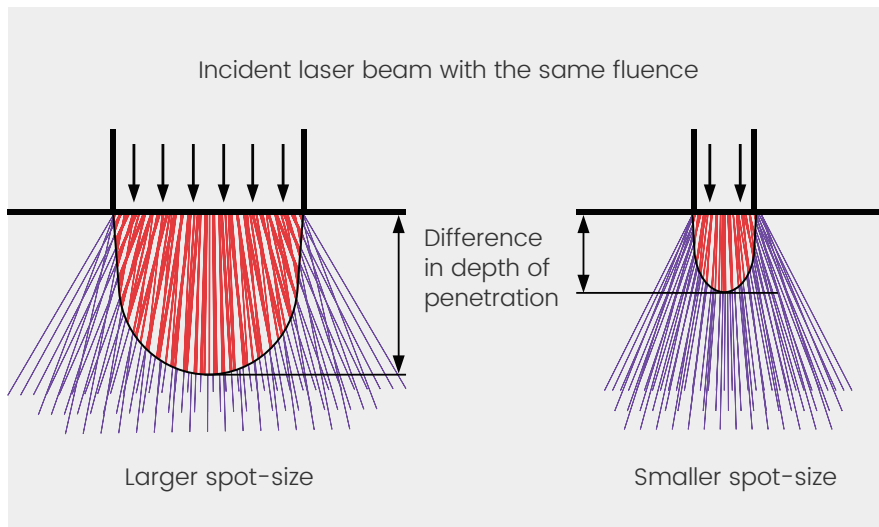

Continuous working

TriX: The Ultimate All-in-One Solution for Hair Removal

Equipped with three clinically proven wavelengths and advanced simultaneous 'sandwich-style' emission, TriX delivers precise energy from the epidermis directly to the follicle root. This innovation ensures safety and efficacy across all skin types while achieving a dual leap in therapeutic efficiency and comfort, redefining the new standard for fast, safe, and superior hair removal.

Efficiency

Large spot size 12mm×20mm

A larger spot size increases the depth of heat penetration and allows the hair follicle to absorb more energy, improving treatment effectiveness.

Sapphire crystal 4°C
constant temperature

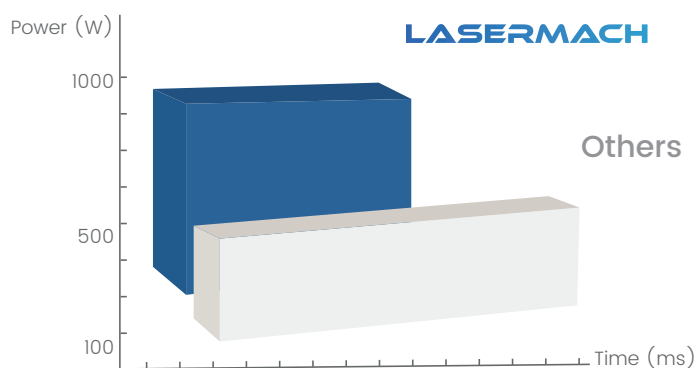

Aesthetic and professional
operation systems

Painless, Comfortable

Higher peak power up to 1000W

High peak power and short pulse reduce lateral heating, which makes patients feel more comfortable, and high power increases hair removal efficacy, which enables operators to complete treatment quickly and efficiently.
